MEMORANDUM

FOR THE MEMBERS OF THE RESTORATION ADVISORY BOARD (RAB) FOR THE INSTALLATION RESTORATION PROGRAM AT NAVAL WEAPONS INDUSTRIAL RESERVE PLANT (NWIRP) CALVERTON, NEW YORK

Enclosed is the Navy's Final Field Report for Vacuum Assisted Oil Skimming Pilot Test conducted at Sites 2 - Fire Training Area and 6a - Fuel Calibration Area, located at the Naval Weapons Industrial Reserve Plant (NWIRP) Calverton, New York.

A draft version of this report was issued to members of Calverton's regulatory community during a Technical Subcommittee Meeting held on February 16, 2000, at the Region I offices of the NYSDEC in Stony Brook, NY. Since no comments have been received regarding the report, the Navy is considering the Draft version to also be the Final version. As such, the Navy is reissuing the report dated January 14, 2000.

Implementation of the Navy's recommendations contained in Section 4.0 of the enclosed report is anticipated during the June or July timeframe.

If you have any questions or would like to discuss the enclosed document further, please give me a call me at (610) 595-0567, ext. 163.

Sincerely,

A handwritten signature in cursive script, reading "James L. Colter", is written over the typed name.

JAMES L. COLTER
Remedial Project Manager
By direction of the
Commanding Officer
